ABOUT US

Agrim Designs, as the name suggests, offers uniquely advanced personalised interior design services for each of our clients, creating an immensely attractive environment that is an upgrade to the quality of life. We look at the project not as an independent property but as a small piece of a larger puzzle. We try our best to create what you may or may not imagine in a low budget.

We give shape to your imagination.

WHAT WE DO?

We provide you with a unique design for your project which includes all kinds of detailed drawings which you can give to your carpenter and execute the project in your presence giving you complete transparency of work.

RESIDENTIAL INTERIOR DESIGN

We will help you build the best residence interior designs that showcase your true reflection. Together, we will design the spaces of your imaginations and dreams. End-to-end solutions for new homes & renovation projects awaits you.

COMMERCIAL INTERIOR DESIGN

We highly consider the needs of you for your commercial project to create the best possible atmosphere required and to ensure optimum flow. We will give our level best in providing a better edge when it comes to your working environment through our personalised commercial designs.

furniture layout, virtual view of
your home and 2D working

Furniture Design Consultancy 04.

Design that gives you designer
Furniture according to your
need and vision.

WHY WORK WITH US?

With this service, you as a client pay a fixed fee for the design and consultation, so this service is very suitable for you if you have the time and want transparency in the whole work.

We only give you designing and as a customer, you have to execute yourself. So it is clear that this service will not cost you much.

we also offer supervision service on a chargeable basis per visit or it will include in your design charges. So in this, we come to supervise whether the carpenters are working as per the given design or not and check the quality and progress of the work.

Working at this particular service offers many benefits. As a homeowner, you have full control over the cost and quality of the material used because you buy everything yourself. All you need is to have some time and ambition to do it yourself.
